END OF LIFE ANNOUNCEMENT: CompactUTM & Compact MegaWall

Effective Date: 15 May 2017

Applicable Models: CompactUTM, Compact MegaWall

3D perception (3DP) is announcing the End of Life/End-of-Sale for the CompactUTM display processor, effective immediately.

Limited quantities of CompactUTM GCM and MCM cards are still available at the time of announcement, and interested customers should reach out to their 3DP sales representative for details.

3D perception's nBox is suggested as an in-line replacement/upgrade. nBox uses the same protocols and control software interface as CompactUTM/MegaWall, and is a simple upgrade path. Customers should contact their regional 3DP sales representative for replacement analysis and further guidance.

| End of Life Products | | Description |
|---|-------------------------------------|---|
|  | CompactUTM Zer0 and Basic models | <ul style="list-style-type: none"> • Multichannel display processor, supporting up to 6 WUXGA (1920x1200) resolution channels • COTS industrial rackmount 4U chassis • Windows 2000, XP OS |
| | Compact MegaWall | |
| Replacement Products | | Description |
|  | nBox | <ul style="list-style-type: none"> • Multichannel display processor, supporting up to 6 HD (1920x1080) or up to 3 channels of WQXGA (2560x1600) resolution channels • Purpose-built rackmount 2U chassis • Embedded Linux OS - no Hard Drive • Hotswappable I/O cards, redundant power supplies • Supports all modern 3DP Northstar subcomponents including StarScan and Dynamic Optical Blenders • Complete datasheet available here |
| | nBox Incl. MegaWall feature | |
